Touch the blank box to bring up the community type dictionary. You may enter a new community type, edit an existing type or clear a community type. When the dictionary box is visible, write the first letter of the community type in the text writing area and the program will find the first community type that starts with that letter. Touch the community type to enter it in the transect.

To move between the greenline transect and the cross section transects use these buttons. Cross section data is entered similar to the transect data. Use the <> in the upper right corner to move between cross sections transects.
